Engineered Quartz & Marble

Teltos Quartz - New to Epsilon Stone

Established in 2008 as a trading company in Vicenza, Italy; Teltos is a world leader in the international supply of superior-quality quartz slabs, produced on world-renowned Breton Inspired Technology.

The cornerstone of their international acclaim and success lies in their constant evolution, always striving for more efficient production techniques, with the purpose of enhancing any living space or commercial environment.

Epsilon Stone is now proud to be the exclusive Victorian distributor of Teltos Quartz, supplying the highest-quality, sustainable surface coverings to builders, designers, architects and cabinet makers all over Victoria.

What Applications Is Teltos Quartz Suitable For?

Teltos Quartz offers near infinite design possibilities thanks to a virtually non-porous surface and incredible hardness, Teltos Quartz surfaces are suitable for almost any indoor application imaginable.

From residential applications, such as kitchen benchtops, splashbacks, bathrooms or wall panelling, to commercial applications and retail areas, Teltos Quartz is an ideal project option.

Quartz is not suitable for outdoor applications due to its internal resin content, which may discolour or fade over time when exposed to direct UV light. A product such as Epsilon Stone Exclusive Engineered Marble, however, offers patented UV protection, for areas exposed to direct sunlight.

What is Teltos Quartz Made of?

Manufactured using the patented Breton Technology, Teltos quartz contains up to 93% natural quartz, combined with bonding agents, one of the lowest resin counts of any quartz, plus special additives and pigments, which combined, make quartz exceptionally hard wearing, practical and highly versatile.

Slab Dimensions

3050 x 1500 x 20mm - Builders Range

3200 x 1600 x 20mm - Luxury Range

Benefits Engineered Quartz

Impact Resistance

Acid Resistance

Water Resistant

High Fire Resistance
